OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18

THE REDCLIFF REVIEW THURSDAY, AUG. 6th, 1931

Number 47

High School Students Create New Record

Approximately 95 Per Cent. of Units Were Passed

High school students who wrote the departmental examinations have received the official statement of their standing on the finals. The results show that approximately 95 per cent. of the total number of units written were passed. This is a new record for Redcliff high school and probably a new provincial record. The Review submits to its readers the following statistics from departmental records which may be used as a basis of comparison:

Provincial average in all Alberta high schools, 75 per cent. Percentage of passes Calgary high school, last three years 83 per cent.

Percentage of passes in the best city schools last year 86 p.c. Percentage of passes in Redcliff high school last year 95 p.c.

The following students passed all the departmental examination units written: Irene Buchholz, Dan Jensen, Phyllis Sanderson, Margaret Pow, Jean Patterson, Annie Shaw, Jim Lowmes, Jim Brown, Lillian Lennings, Elizabeth Palle, John Soukup, Mary Soukup, Ruth Pow.

The following students were recommended in all non-departmental examinations which they studied during the year, Robert Buchholz, Lillian Lennings, Elizabeth Palle, Ruth Pow, Margaret Johnson, Louise Smith, Jim Brown, Mary Soukup, Muriel Collard, Jean Patterson, Phyllis Sanderson, Margaret Pow, Annie Shaw, Paul Garrecht, Helen Rose.

Particularly high marks were obtained by the following students: R. Buchholz, 100 per cent. Algebra 1; Annie Shaw, 97, algebra 1; Lillian Lennings 94, literature 1; Irene Buchholz, 93, algebra 2; Paul Paul Garrecht, 91, literature 1; Lillian Lennings, 91, algebra 1; Robert Buchholz, 88, geometry 1; Lillian Lennings, 88, history 1; Margaret Pow, 85, algebra 1; Jim Brown 85, science 1; Jean Patterson, 85 literature 2 and 84 algebra 2; Elizabeth Palle 84 composition 1; Lillian Lennings, 84, geometry 1; Muriel Collard, 82, history 1; Lillian Lennings 82 composition 1; Dan Jensen, 81, composition 1; Margaret Pow, 81, literature 2; Elizabeth Palle 81, literature 1; Annie Shaw, 80, science 1; Margaret Johnson, 80, geo stry 1.

At a meeting of the Board of Directors of the Oilrick & Coal Co. Mr. C. G. Buchholz was elected vice president and general superintendent of the company to succeed the late E. H. Sellhorn. Mr. Buchholz has been associated with this company for a number of years and as he has acted in several different capacities around the plant he has become well acquainted with its workings and is thus well equipped for assuming his new responsibilities.

Mr. and Mrs. A. McKenzie and son Stewart left yesterday for Flaport to which point Mr. McKenzie has been transferred as manager of the Imperial bank. Mr. H. C. McDonald, of Brandon the new manager here, has already taken charge.

Ladies' Auxiliary Have Good Picnic

Full Afternoon Program Held at The Central Park

It was a real picnic the Ladies Auxiliary arranged for Legion members and their families at the Central park yesterday afternoon. Special attention was given to the entertainment of the children who turned out in goodly numbers at the starting point and were conveyed to the park in cars. Here games of various kinds were played and an abundance of ice cream and other delicacies provided, making a real good afternoon's sport which the children thoroughly enjoyed and the parents greatly appreciated. A program of foot races for all, from 2 years up, was run off during the afternoon. The following is a list of the winners:

10 years and under—J. Balmer, D. Patterson, G. Newnam Girls 12 and under—M. Fairhurst, S. Millard

Boys 14 and under—W. Pearson, J. Balmer, D. Patterson Girls 14 and under—J. Millard H. Hope, M. Fairhurst

Ladies' Race, 60 and under—D. Kitchen, Mrs. Hurbert, Mrs. Mrs. Osgood

Boys 16 and under—W. Pearson, A. Johnson, G. Newnam. Men, 60 and under—T. Balmer A. Patterson, H. J. Cox

Young Ladies Race—Jean Patterson, Martha Balmer, Janet Patterson.

Canada To Benefit By Australian Treaty

Promises to Increase Exports of Canadian Goods

The new treaty between the Dominion of Canada and the Commonwealth of Australia, has given a wide variety of Canadian products a preferred position in the Australian market, and constitutes a basis of general optimism concerning the future development of trade between these two British royalties. Canadian automobiles, newspaper, timber and canned salmon have been given special consideration, but when Canadian exporters have had time to make their goods better known in the Australian market there should be also a substantial increase in the volume of sales of a wide variety of other products. It has been stated that the value of United States exports will suffer by about twenty-five million dollars, but there are so many opportunities which have been opened to Canadian exporters by this new treaty, that its full ultimate effect cannot be estimated closely. Of the 433 items which make up the Australian tariff schedule, there are 410 on which preference has been granted.

WHITLAM FARMER FOUND DEAD IN HIS BARN

Richard H. Hibe a well known farmer of the Whitla district, was found dead in his barn on Saturday last, having hanged himself from a beam. Deceased was 62 years of age. He leaves a wife and five children, three of whom are married. Dispendency over ill health and financial worries are supposed to be the cause of his rash act.

More Items of Local Interest

Mrs. Ratcliff and her daughter, Coralie, formerly of Redcliff as visiting Mrs. Hildebrand at Vauxhall

Mrs. Cecil T. Hall left on Wednesday for Hamilton, Ontario where she will spend a month visiting friends and relatives.

The report of the Dept. of Agriculture, London, shows that the wheat acreage in Britain this year lowest on record

All the Redcliff high school pupils who wrote on the departmental examinations were successful in passing all the units on which they wrote:

Mrs. Bert Sheldon, who has been visiting her sister at Taylor, Sask., for the last few months, returned to town last week. She was accompanied by her sister, Mrs. Tom Hitchen, who is recuperating after a serious illness.

Dave Broadfoot's car narrowly escaped being destroyed by fire last Saturday evening. Passers by noticed a small blaze coming from the window and were successful in getting the fire out before much damage was done. A live cigarette is thought to have caused the fire.

Mr. David Broadfoot let on Tuesday for White Horse, Yukon, where he has accepted a position as principal of the public school. All wish him success in his new field. Mrs. Broadfoot accompanied him as far as Vancouver where he will visit for a few weeks.

Mr. and Mrs. G. W. Fitzhenry received word Tuesday informing them of the sudden death of their granddaughter, Hazel Harriet, at Williston, N. D. Deceased was their daughter's child and was 21 years of age.

If any one is doubtful as to whether lowers will grow in Redcliff or not, he need only take a loo at Mrs. Millard's garden on Fourth street. It is a bower of bloom and perfume at the present time, and one of the few beauty spots in Redcliff. Amateur gardeners would do well to get advice from Mrs. Millard in regard to soil preparation and seed selection.

Mr. and Mrs. Harry Champ and son, Eddie, go now on an extended visit to their old home in England. Mr. and Mrs. Champ will celebrate their silver wedding while in the old land and it is their intention to spend the anniversary season travelling over the same territory in which they spent their honeymoon. This will take them to the Isle of Man where, twenty-five years ago they spent their first week of married life.

It was at Newcastle, Staffordshire, on August 6th, 1906, that Harry Champ and Miss Sarah Cope were united in holy wedlock by Rev. Arthur Baimes. The Review joins with their many Redcliff friends in wishing them a pleasant anniversary holiday and a safe return to Redcliff where they may spend many more wedding anniversaries.

Mr. J. E. Tarrant left last Saturday on a motor trip to California to visit his brother

Mrs. Fred Smith of the B. O. Springs district, is suending a in Banff on a holiday.

Mrs. H. Leppard and family and Mrs. Geo. Myers and family are spending this week holidaying at Elkwater Lake.

Mrs. A. Lidgett and small son, of Eaton, Sask., are at present visiting Mrs. Lidgett's parents, Mr. and Mrs. K. Johnson.

Mrs. A. E. Tester, J. T. Devitt and Joe Tester left Tuesday by motor for the Peace River district. Dr. Wray will join them at Calgary.

Will the person who took a gold wrist watch from the ladies' dressing room at the swimming pool kindly bring it to the Review office and get reward.

The splendid appearance of the lawns and flower gardens at the school reflect great credit upon Mr. Ellis, the janitor. Mr. Ellis is a gardener of many years standing and certainly "knows his marigolds."

Some Liberal newspapers aided by McKenzie King and other members of parliament, are having quite a time these days fishing around for red herring to draw across the trail in order to take the attention of the public away from the horrible exposures brought out by the special committee appointed to investigate charges made against the Beauharnois Co. by Robert Gardiner, M.P.

Mrs. Edward Ellis received a letter recently from her sister-in-law in India stating she feared her son had lost his life in the last earthquake in New Zealand. No word has been heard from him since the quake.

Miss Margaret Sneddon, of Calgary, who has been the guest of Miss Norma Wallof for the past week, left on Wednesday for the Bingville district to visit her sister, Mrs. J. Hullah.

Government Cancels Beauharnois Contract

Will Now Operate For General Advantage of Canada

As a result of the Beauharnois investigation, a bill was passed deferring parliament prorogued, cancelling the agreement made with the company by the former government and declaring the work of this enterprise to be for general advantage of Canada in the future. The bill provides that the Beauharnois canal shall hereafter be under the legislative jurisdiction of the parliament if Canada and be made available for navigation along that all water, land, dams, locks and other works appurtenant to said canal are hereby declared to be works for the general advantage of Canada.

The Bennett government was now long in taking action to safeguard the interests of Canada and her people against any further graft in this enterprise

Foreigners Leaders In All Disturbances

Timely Warning Issued At Close of Federal Session

One very noticeable feature of the several communist disturbances which have taken place in some of the larger centres of the west during the past month, is that in every instance the leaders who have caused them have been men with distinctly foreign naces, who travelled from centre to centre just to start something. The following are some of them: Aro Finni, Carl Nielsen, Yuko Valahim, Jack Nickolson, Vladimir Sekre-ta, Karl Sherenata, Louis Waldeura, Nick Malach, etc. Most of these are now under arrest in either in Calgary, Edmonton or Vancouver. It is had to understand how white people, and in some cases British subjects, will allow themselves to be led and influenced by this class of foreigners whose only object appears to be to make it more difficult for those in authority to proceed with the work of relieving distress, systematically and orderly. The wonder is that officials deal so leniently with them. Just before parliament prorogued Pemie Bennett issued a note of warning when he told the House of Commons:

"If the Government is given reason to believe, as there may be some cause for its believing, that there is a settled purpose in the minds of some people to take action against the maintenance of law and order, or make attempts to impede the diligent task with which we are charged, then we will take such action as in the judgement of the administration of this country will free this country from those who have proved themselves unworthy to be of our Canadian citizenship."

Churches

ST. MARY'S CHURCH

CHURCH OF BETHLEHEM

The Bethlehen church has been closed indefinitely.

Interest Falling Off In Football Circles

Changes in Schedule Are Not Sufficiently Advertised

What appears to be a falling off in interest in the football games lately is not the fault of fans but rather the fault of the officials of the league and the respective clubs, in that the games have not been properly advertised and due publicity has not been given to the several changes made from time to time in the last schedule drawn up.

In the last few games played there has been a common thing to hear scores of fans say: "I didn't know anything about it." This delinquency cannot but have a disappointing effect on the finances of the clubs at the end of the season. The last game drawn to be played here between the Clites and the Brick & Coal did not put in an appearance, although the Bricks were in line up waiting for them. In such a case it is only reasonable to expect the Clites to have phased out to say they were not coming. This would have saved the home team a lot of unnecessary trouble at the last moment.

AIN'T IT THE TRUTH

he Leithridge Herald appears to be very much upset because as it says editorially: "It cannot find a whiff of low tariff sentiment in the speeches of U.F.A. members of parliament recorded in Hansard. The Herald goes on to say that Mr. Bennett has had more co-operation and more pats on the back and less attacks on his policy generally from the U.F.A. group than ever was the case when the Liberals were in power."

Well now, honestly, isn't it only natural that this should be the case? It was only to be expected that the U.F.A. group would eventually get fed up on being used by a pair of rubber boots to get the Liberal party over the sloppy roads at election time and then throw to one side like the rubber boots again, when the roads dried up.

The U.F.A. group at Ottawa has not been slow in discovering that although Mr. Bennett has been in power only for a year, he and his government have proven to be the real friends of the people this country is supposed to represent. Old Barnum was right when he coined that phrase about not being able to fool all the people all the time.

The two town girls football teams will play a game here tonight, Thursday.

Mr. and Mrs. R. C. Hargrave and family returned on Tuesday from Lake Windermere where they have been holidaying for the past two weeks.

During one of the severe electric storms which passed over this district last week a granary belonging to Fred Smith, Box Springs was struck by lightning and completely destroyed. Although there was no grain in the building it was full of machinery and tools all of which were destroyed.

Lessons Of The Depression

During periods of depression such as the world is at present experiencing the almost universal tendency is to look upon the gloomy side of things to the exclusion of everything that is hopeful and encouraging. As a result there has been a plethora of dire forebodings, headshakings, and pessimistic utterances, accompanied by an air of severity or optimism and hopefulness. People generally call this, and doing things continually deep upon, the dark side of life, everything that is bad in the present situation, but it is a sign indeed to discover any one who finds something good, or propitious or bright, arising out of existing conditions.

Yet nothing is wholly bad and there may, and often does, develop out of the adverse circumstances some of the best and finest things of life. The average person, for their less fortunate fellow-creatures has been made aware for a long time. Power people are inclined to turn a deaf ear to stories of distress to "bottle up" help. The man of work is not, as a rule, noticeably turned away but he receives kindly and sympathetically, even though it may not be possible to do much or anything for him. Thousands who have little to spare are nevertheless dividing that little with those who have nothing. Their hearts believe, less hand and more sympathy in their relations with another as a result of an appreciation of existing conditions and problems. The development of such a feeling is so much gain.

It is a lesson, too, that we are inclined to believe, that many people are beginning to realize the true weakness of life—that work, about which in times past they have been inclined to grumble and regard with distrust and as something they are forced to do, is after all one of the greatest blessings conferred upon man by the all-wise Creator of the universe. Today, employment, the opportunity to work, is regarded by nearly everybody as one of the greatest blessings that can befall a man.

Drought Decimates Ducks

in Saskatchewan this year

Dry Year Takes Heavy Toll Of Waterfowl

Broods

The death rate among young wild

ducks in Saskatchewan this year

has been estimated at 75 per cent

because of the drought, has been extremely

heavy, was the opinion expressed

recently at a special meeting called

by members of the Saskatchewan

Fish and Game Protective Association.

Arthur Eiler, game guardian of

Saskatchewan led by W. B. Bell, of the

Bureau of Biological Survey, Wash-

ington, D.C.

The extreme seriousness of the

situation could not be stressed too much,

was the unanimous opinion, and the

sportsmen were the shooting season

greatly curtailed if the United States

will do likewise.

Dr. Bell said he had come to Sas-

katchewan because of the alarming

reports received by his department.

The department had not been sure

that the reports had been exaggerated

and had decided to investigate

for itself. "And I can assure you,"

he declared, "that the reports have

not been exaggerated. Mr. Eiler

and I have just finished a 500-mile

trip and have seen first-hand the

100 ducks and of this number only 24

were young ones. On one lake we

saw 320 ducks and on another 100.

There were no more than 100 ducks

anywhere among them. It is the

belief that the adult ducks have

been killed by their broods on a

number of small sloughs had died

of the drought."

Mr. Eiler stressed that the trip had

been very thorough on foot and

dog investigation standpoint. At

every point touched very full equip-

ment had been made including guns

and farmers and they had declared

that the death rate had been extreme

and that the loss of the birds was 75

per cent. Of the young duck population

a great portion of the province had

survived the drought.

Canadian Mines Pay Dividends

Several British Columbia Companies

Distribute Substantial Sums

—All mines are not just holes in

the ground into which suckers drop their

money bags and take out nothing but

low-priced metal material, Canadian

mines are still paying steady

dividends.

Several British Columbia compa-

nies are to pay out their annual

—The Passing Show, London.

WORLD HAPPENINGS BRIEFLY TOLD

Displays of 200 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviator who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-days' meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 4th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Kunkin, Eskimo hunter of the Laurier Expedition, who became violently demoralized when he saw his first movie at Thornbury, Ontario.

Among scientists who have been awarded long-term grants for medical research by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Rt. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver entree dishes. The gift was in recognition of his 61st birthday.

In front of the Australian Commonwealth building at Canberra will be shortly erected a 200 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters in the Meade River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 300 miles from its destination.

Fruit Land Taken Up

Over 50 acres of orchard and vegetable land were taken up by new settlers in the Southern Okanagan of British Columbia during the past year. Prices ranged from \$80 an acre for raw land to \$150 for improved and bearing orchard. Approximately 25,000 young fruit trees were planted.

War Hero Dies in Theatre

General Bertrand, national hero for his spirited defence of Lidge and for the Year campaign during the Great War, dropped dead in a theatre at Brussels. He was credited with delaying the Germans for ten days at Lidge whilst Marshal Foch reformed the French army for the defence of Paris.

The youth who claimed that the four kinds of sheep were: white, sheep, black sheep, Mary's little lamb, and hydraulic ram, was certainly not a true son of the soil.

Conrad Week-End Cruises

Something New in the Line Of Ocean Travel

A pioneer steamship company for the past 21 years, the Conrad Line came to the front this year with something new in the line of ocean travel: the week-end cruises, a voyage which gives practically everyone who can afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau, down near the Tropic of Cancer, more than 800 miles south of New York, and the islands of Bermuda, 600 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in sight-seeing, golfing or sea bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit the many historic points in the environs of Halifax, the birthplace of Lord Cornwallis, founder of the line which bears his name.

The Conrad's week-end cruises are made by the line's express steamers, the "Bergamot," "Aguilone," and "Mauretania," among the largest and finest ships in the world.

These lines steam through the sea at a leisurely pace of 16 to 20 knots, so that the voyager may get the full glow of the breezing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be: Everything! People play the regular deck games and invest new ones of their own; they bet on the race of the ship, as well as upon the horses on deck; they bathe in the swimming pool or in the huge luge tank on deck; they dry themselves by lying prone on the hatch tops or take naps in deck chairs; they tell about in bathing and various kinds of sports, the girls displaying many types of wide-legged pajamas in short; they do very much as they please, and they offend no one by doing so. Also there are lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line is careful to make sure that there is no economy practiced on the bill of fare; that dishes are added rather than cut out.

The cruise ship is first class for these week-end cruises. There is no forbidding sign anywhere. Passengers are permitted to use all the public rooms and every deck from stem to stern.

These trips make a strong appeal to vacationists who go away for two or three weeks every summer. They give each person a chance to begin, or close the vacation period with a sea trip and yet leave enough time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot station, sailing through Ambrose Channel. This is an incident which lines the railroads, and the ship's company leaves in a small rowboat, being picked up a hundred or two hundred yards away by the tugboat.

Soon after passing here all land fades out of sight. The next delight of this kind is catching the first sight of the land to which the ship is steaming. This always reminds the passengers of the thrill which came to Columbus when the first land loomed up in the West Indies.

Returning from a cruise a great crowd moves to the rail note the arrival of the Sandy Hook pilot in his little rowboat, looking like a chip alongside the huge liner.

At quarantine, off the eastern shore of Staten Island in New York Bay, the port doctor comes aboard and when he clears the ship the customs and immigration men board the steamer from a coast guard cutter and check up on every passenger on the ship, leaving no loop-hole for the stowaway.

This ceremony over the ship proceeds to the pier, where many friends await the arrival of the tourists. Once the pier, the baggage is quickly passed and the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book at once for a week-end tour on the wide Atlantic.

Fruit Market in China
Fruit shippers of the Okanagan show much interest in the statement of Ch. J. M. Cochrane, Canadian Government Trade Commissioner at Shanghai, that China offers a large outlet for low grade fruit at an economical price. The subject was brought up at two meetings in Vancouver addressed by Cochrane.

Edmonton a City Of Homes
Eighteen hundred new homes were erected in Edmonton during the last six years, or an average of 300 a week. This year, it is pointed out in a special issue of the Edmonton Journal. The original cost of these homes, not including rent, was \$1,000, figures at about \$6,000.

Buried Treasure

Party of Vancouver Men Will Sail To Cocos Island In Search of

Lured by legendary tales of fabulous treasure buried by pirates of olden days, a party of Vancouver men, headed by Col. J. E. Leckie, will sail for Cocos Island, 900 miles off the coast of Costa Rica.

It is popularly supposed that more than 800 tons of treasure, valued at \$60,000,000, is hidden on Cocos Island, buried there by Thompson, Davis and other famous pirates of early days. Wealthy citizens of Peru are also said to have hidden their gold and jewels there during the revolution of 1883.

Three other British Columbia expeditions have searched for treasure on Cocos Island, one in 1882, on the Eliza Edwards, under command of Capt. P. S. Mackenzie, of Vancouver; another in 1905, from Victoria, and another in 1924.

Sir Malcolm Campbell, world's auto speed record holder, announced recently that he will make another visit to Cocos Island this summer. He is reported to be outfitting an expedition in England now.

Col. Leckie's party will sail direct to Costa Rica, where eight Costa Rican soldiers and an officer to lead the interests of the state will join the expedition. Cocos Island is owned by Costa Rica and the state still claims one-third of whatever treasure is found.

Keeps Editors In Order
C.N.A. Convention
One of the most important items in evidence at the Canadian Weekly Newspaper Association Convention in Regina, Saskatchewan, is the gavel used by President Malcolm Maclellan to keep the editors in order. It is made from the wood of old Port Malden, vintage about 1800 A.D., and is reminiscent of General Isaac Brock and Tecumseh, the famous Indian chief.

This gavel was presented to the association in 1920 by the Hon. E. St. Clair Phillips' Association. At that time Hugh Savage, of Dunsmuir, B.C., was president of the association, so the gavel was handed to him with the words, "From one savage to another."

The gavel is suitably decorated with a silver plate setting forth its antiquity and usage.

Goods Had Vanished
In Molit Had Customs Officials Debated on Classification
It is only within the last century, says the Manchester Guardian, that we have learned to temper time heat—when we get it—with feed tanks. The first cargo of summer ice brought to this country was shipped from Norway, and it arrived in the Thames in June, 1822. The customs officials had to deliberate long and earnestly as to the heading under which it should be classified for duty. When at length they decided to list it as "dry goods" the entire cargo of 300 tons was found to have melted.

Teacher—Holla, what is Jam?
Holla—Jam is what causes bread to taste not so nice when there's none on it.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand even the fiercest temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN RUNBROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Sponsor Withdraws Bill

Proposed Amendment Dealing With N.S.F. Cheques Is Dropped

On the suggestion of Hon. Hugh Guthrie, minister of justice, the bill of A. W. Neill (Ind. Conn.-Alber.), dealing with cheques issued without funds was dropped by its sponsor in the House of Commons. In brief the proposed amendment provided that if cheques issued with no funds or insufficient funds in the bank were not honored within a reasonable time the issuer would be liable for the first offence to a fine not exceeding \$100 or three months' imprisonment, and to a second or subsequent offence, to a fine not exceeding \$100 or three months' imprisonment.

Certain amendments were introduced this session to the criminal justice bill, dealing with cheques. Mr. Neill really had in mind, "The view I take," the minister of justice stated in speaking of the measure presented, "is that the proposed amendment would open the door to issuers of worthless cheques."

Under the bill the issuer would not be liable unless he failed within a reasonable time to pay the amount.

New Senators Appointed
Patrick Burns, of Calgary, Alberta, Named a Member of Upper Chamber
Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate. Arthur MacCortie, K.C., Poetist, Sask., has also been named a member of the Upper Chamber. Official announcement to this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Lezard, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. G. T. Turritt last fall. The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death, slightly more than two months ago, of Senator G. G. Foster, of Ontario. When this vacancy is filled, Conservatives and Liberals will have equal representation.

Introduced Amendment To Companies' Act
Bill Aims To Aid Employers In Purchasing Homes
Among the Companies' Act as so to enable a company to make loans to its employees for the purpose of purchasing or building their own homes, even when such employees are shareholders of the company, Hon. H. Cahan, secretary of state, introduced a bill into the House of Commons. The bill received first reading.

The amending bill also permits the auditor of a company to be a director, when such company's bonds and shares are not offered for public subscription.

Holla—Jam is what causes bread to taste not so nice when there's none on it.

Another Notable Flight

Captain Hawkes Makes Remarkable Time In Eastern Canada Hop

Quebec, Montreal, Toronto and Ottawa have been drawn closer together by a series of sensational flying performances of Captain Frank Hawkes, a famous United States speed pilot.

Montreal is no more than 32 minutes from Ottawa, 48 minutes from Quebec, and 108 minutes from Toronto, while the capital and Toronto are only 70 minutes apart. These were the times taken by Hawkes and his monoplane in a flight from Quebec to Montreal, then on to Ottawa. Several of these times were batted as new records.

Hawkes flew from Quebec to Montreal where he enjoyed breakfast, Ottawa as guest of Hon. Hanford Lockwood in Toronto, tea in MacNider, United States minister, guest of Montreal Light Aero-Club at dinner.

Altogether Captain Hawkes was in the air four hours, 18 minutes and during this time he covered a distance of approximately 800 miles, averaging 197.6 miles per hour. The notable recent flight of Captain Hawkes from Paris to London, on a single day, also the flight that took him from London to Rome and back in a single day.

Research Grants
Westerners Receive Aid Under Banting Research Foundation
Among the scientists who have been awarded long-term grants for medical research by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

Prof. F. D. White, P. G. Mar, and Dr. R. H. Fraser, all of University of Manitoba, were awarded short-term grants.

Professor White is the assistant professor of bio-chemistry at the Medical College, Peter Mar has completed his second year in medicine, and Dr. Fraser is the lecturer in physiology and pharmacology. The research work which is being done by them covers the present summer only, and was begun shortly after the closing of the winter term at the medical college. Peter Mar is a graduate in science of the university, and has this qualification for research work.

Onion Diet For Sheep
Sheep flocks on Colorado's western slopes have been put on an onion diet to reduce last year's surplus. P. D. Warren, warehouse owner, said hundreds of sacks of onions have been given sheep owners, there has been no market for them.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

Capitalism An Admirable System

Capitalism Not to Blame for Depression Says Sir Thomas White

The statement that capitalism is to be destroyed is a favorite with Socialists, Communists and other kinds of reds. It has been repeated so often without contradiction that people who are not well-informed on financial and economic subjects may have come to believe that it has some foundation. Sir Thomas White therefore did a public service in declaring at the meeting of the International Association of Controllers and Accounting Officers that society as constituted in Canada and the United States offers the best possible way of human life as administered with sanity and judgment.

Sir Thomas admitted that capitalism is on trial because so many people question its advantages. "Nevertheless," he said, "the fault is not in the capitalistic, the individual system. It is an admirable system. The fault is in ourselves." He went on to credit that if people were extravagant, if they became inflated, this misanthropic system would exhibit its penalty. The good, old-fashioned principles of thrift and economy would gradually gain the upper hand. They will help to reinforce confidence in the future.

—Toronto Mail and Empire.

Hints For the Housewife

Right Be Used When Things Go Wrong in the Kitchen

Too much salt often has spoiled the soup. A remedy for this is to add from half a cup to a whole cup of sliced raw potatoes to the soup, and cook for 15 or 20 minutes. The potatoes absorb the excess salt. Deliciously flavored vegetables such as asparagus and peas require very little salt, particularly when dressed with butter for serving. Use salt sparingly for its easy to add salt to suit individual needs.

If the mayonnaise separates, take another egg yolk in a fresh bowl and slowly beat in the curdled dressing containing as usual until all the lemon juice and oil is used.

If a custard sauce curdles, beat it well with a drier beater. This same beater often will beat the lumps out of a white sauce that has been made in too big a hurry. If the sauce is very thick it can be rubbed through the sieve and reheated.

A tomato cream soup that shows an inclination to curdle can be converted into a thick tomato puree by adding butter and food rubbed together in the proportion of 1 tablespoon food to each cup of soup.

R.C. Plans Reforestation

Artificial Planting Resorted To For First Time in Province

Reforestation on a large scale is contemplated in R.C. The province has 8,000,000 acres in timber reserve, but, in addition, is now laying out a large tract of land, especially suitable to the reproduction of Douglas fir. While natural reforestation is being resorted to, the re-planting of seedlings is being resorted to. The first of these seedlings, planted next year, for the first time in the history of the province, artificial planting will be resorted to.

Two of the areas likely to be selected are about Harrison Lake and Powell Lake. The first embraces an area of some 300,000 acres between Harrison and Alouette lakes and the latter, which also embraces some 200,000,000 feet of mature timber and second growth, lies at the head of Powell Lake and embraces the upper watershed of Powell River and Lois River.

The extent to which re-planting will be carried out is indicated by a statement that 800,000 seedling Douglas fir trees will be planted out in 1933 and the following year.

Has Saved Many Lives

Captain Sir Arthur Ross, commander of the Cunard liner, who retired recently after 30 years' service with the Cunard Steamship Company and 46 years as a sailor, has saved more lives than any other commander at sea. It was he who, as commander of the "Carpathia" in 1912, steamed at full speed for 60 miles to the aid of the sinking "Titanic" and rescued more than 700 passengers. He is 62 years of age.

The old stenographer, who was leaving, was passing the new one on the characteristics of the boss. "You'll find Mr. Brown a man of few words," he said. "Geel 'Em in luck!" thought the green stenographer. "I don't know very many."

The first formulas for baking powder were developed in the United States in 1808.

Historic Landmark May Disappear

Adelphi Terrace May Disappear in Modernizing of London

Adelphi Terrace, long noted for its literary associations, and some of the adjacent property may disappear in the modernizing of London at the Adelphi estate is said to auction this autumn.

This lovely and historic backwater of eighteenth century life will be missed by more than American visitors, most of whom include it in their London pilgrimages. But inevitable progress has sounded the knell of the tiny street perched high above the Embankment Gardens, overlooking the Thames.

Sir James Barrie still lives in the corner house on Adelphi Terrace, but his erstwhile neighbor, George Bernard Shaw, has moved to Whitehall Court. David Garrick lived in the centre house of the terrace, within a few hundred yards of the scene of his stage triumphs, and here he died in 1779. It was here that Raleigh lived and young Dickens worked. It was here that the brothers of the Adelphi erected the Theatre of Old Durham house the finest architectural block in London. At numbers 6 and 7 the Savage Club has had its home for many years.

Beneath the terrace are the no less famous Adelphi arches, which also are famous. When these arches, built by the Adam brothers in 1770, go, a new home will have to be found for the stocks of the London Stock Exchange.

Many busy represent the purchase of noted connoisseurs of wine whose stocks are kept there during the years they are undergoing the process of maturing. The time is not so very long ago when the river flowed right up to the arches and barges unloaded their wine cargoes there.

Has Many Possibilities

English Language Can Be Used in Various Ways

The English language so much the popular because one can do so many things with it.

At a dinner given to Prof. A. H. Young of Trinity College in Hart House, Toronto, Colonel H. C. Osborne in proposing the toast to the guest of honor, referred said to the stickler for punctuality. On one occasion, said Colonel Osborne, a student, after frequent admonitions for tardiness, was the first to appear for a lecture. He was commended by Professor Young in these words:

"I see you are early of late. You used to be behind before. But now you are first at last."

Not So Good

There is a man in our town, and he was wonderful when he swore by all the gods above he would not advertise.

But one day he did break this rule, and hereby hangs a tale: The ad was set in real small type, and headed "Sheriff's Sale."

Toy balloons are used by coast and guard officers in determining wind conditions.

It isn't advertising that is costly. It is oblivion.

The Proposed Straight Northern

TRANS-CANADA HIGHWAY ROUTE

HUDSON BAY

JAMES BAY

QUEBEC

ONTARIO

MANITOBA

ALBERTA

SASKATCHEWAN

YUKON

THE above map shows the transcontinental line of the Canadian National Highway from Quebec City to Winnipeg alongside which it is proposed to build the Trans-Canada highway. Completed portions built by the provinces are shown in solid lines. The irregular line arising in Ungava depicts the height of land around Hudson Bay, along which many mining developments have been uncovered. It is claimed that the distance between Mani-

A Mechanical Brain

New Calculating Machine—Things Quickly in Queer Way

Invention of a mechanical brain whose great merit is mostly light, has been announced by the Massachusetts Institute of Technology.

The brain is a calculating machine, which makes use of light, by a trick almost as simple as the cutting out of paper dolls. It performs in a few minutes mathematical problems which by human brains and hands require anything from hours to days.

The analysis graphs by turning them into light. Graphs are lines showing averages. They are the kind which the and fall, like a tracing of mountain peaks, to picture anything from a series of business cycles to the variations of good radio reception.

The paper on which these graphs are traced is treated so that the portion below the graph is transparent. The effect is like cutting out paper dolls outlined as openings in the original card.

An Ancient Food

Honey Used As Food Since the Dawn of History

Honey is one of the oldest foods of man. That is, it is the only food that early ancestors discovered the honey of the wild bee long before they learned to make bread.

The honey of antiquity was likely as good as that of today except that different flowers at that time gave it a flavor different from that of our modern product.

Honey is unique in that it is the only unmanufactured sweet available in commercial quantities. It contains simple sugars, easily absorbed by the human system. Honey contains unlimited quantities practically all the elements of a perfect food except the vitamins.

There is no honey other than that made by bees, and therefore it is a made food to use because it is clean and pure.

Longest Day Not Fixed Date

Director of Dominion Observatory Gives Reason For Change

Sunday, June 21, was not the longest day in the history of Canada this year, as is the common impression. Technically the longest day was June 22 this year.

Dr. R. Meldrum Stewart, director of the Dominion Observatory, said that the method of reckoning is the time at which the sun is farthest north. Some years it is only a matter of seconds difference as to which day is actually the longest according to this reckoning.

"Oh, Mr. Policeman—a man has been following me."

"Are you sure he was following you?"

"Yes, I went back two or three times to see if he was following me."

The naturalist limits the use of the word "bug" to insects whose mouth parts are like a tube through which he can suck the prime requisite, animal blood. Many new discoveries by scientists have gone unnoticed, the specialists assure, because they have not materially affected the consumer's pocketbook adversely.

The average consumer is more concerned over whether insects destroy crops or the drought curtails production than in any improvements which scientists may effect in varieties, in the opinion of horticulturists.

The Real Cost Factor

Home Grown Feeds Help Greatly To Reduce Production Expenses Of Live Stock

In order to reduce production costs of live stock and live stock products large acre yields of home-grown feeds for the prime requisite, animal husbandry experts of the Dominion Department of Agriculture assure. One of the best methods in the world to the herd not as so many pounds per cow, but per acre of land that grew much more than that in turn fed the herd. Only then will they exist in proper relationship. This means thorough cultivation and efficient farm practice better than ever before.

In a black bass family the male prepares the nest and later stands guard over the eggs.

real or Ottawa and Winnipeg will be shorter by 200 miles, following this Northern straight route, when a Quebec feeder road from Maniwaki to Senneterre is completed. It advocates use for local and inter-provincial use, promoting agricultural settlement and development of unbelievable natural resources, it would make accessible to Canadian and United States tourists an enormous landscape of unparalleled hunting and angling opportunities.

Vegetables Are Being Improved By Science

And Consuming Public Is Slow To Recognize Fact

Slow as science progresses in the improvement of food commodities, it still is several jumps ahead of the consuming public, according to vegetable specialists at Michigan State College.

Most consumers still order "string beans" when they purchase fresh and canned vegetables, but in reality, the specialists assure, there no longer is such a commodity as string beans. Plant breeders at Michigan State College and at various agricultural experiment stations have bred the "string" out of many beans.

In breeding out the strings, the scientists have further improved the vegetable by breeding more "snap" into the pods. Vegetable specialists declare the proper name for string beans now is snap beans and was beans. Freshly picked snap beans now readily snap in breaking, making it unnecessary to use a knife in preparing for the table.

Scientists also have improved other vegetables. Prof. Geo. Starr, while a member of Michigan State College, developed red beets which will not fade in cooking or processing. When he undertook the project many varieties of beets turned pink and even white in cooking.

Considerable work also was done in the development of earlier maturing varieties of sweet corn, in breeding a higher sugar content in sweet corn and cantaloupes, in reducing the seed content of tomatoes, in advancing varieties of tomatoes, and in increasing yields per acre in breeding "yellow" resistant varieties of celery and cabbage and in improving standard varieties of onion.

The average consumer today little appreciates the improvements made in most vegetables and green stuffs by scientists in the last decade or more, according to vegetable specialists. The improvements have been made so slowly that few persons outside the experiment stations and agricultural colleges have been aware of change of quality or growth characteristics.

The public's attention usually is not called to developments in the truck gardening industry until some new pest or disease menace the supply and retail prices are influenced thereby. Many new discoveries by scientists have gone unnoticed, the specialists assure, because they have not materially affected the consumer's pocketbook adversely.

The average consumer is more concerned over whether insects destroy crops or the drought curtails production than in any improvements which scientists may effect in varieties, in the opinion of horticulturists.

Mixed Farming in Manitoba

Synthetic Fertilizer Purchased Last For United States Settlers

Most farming on a large scale will follow the arrival in Manitoba during the summer of a number of farmers from Minnesota, North Dakota and Wisconsin under a colonization scheme sponsored by a Minneapolis syndicate.

The syndicate, through a Winnipeg agent, has purchased 30,000 acres of farm lands in the Lakeview district, about 100 miles north of Winnipeg, and is negotiating for another 30,000 acres. The syndicate has not yet decided on the location of the settlement.

The vanguard of the United States settlers is expected to arrive in the Lakeview district soon.

Looking for Business

A notice to the business Churchmen reads—

"We have decided to reduce our charge for an obituary notice from .05 to .02 a word. We hope that this reduction will be the means of making this column used more by our church people."

Bridge Arch From Farm

Ariston's oldest farm is a three-acre place forming the top of the arch of Goodfellow's natural bridge in the colorful district north of Redwood dam. The soil of the farm is good. The bridge is 180 feet high and has a wall to wall spread of 280 feet.

"You can tell a polite man. He sits at a table and sips water while the vulgar table-powder gets service."

"Who crashed your ball hit like that?"

"Pardon me, that is my wife's new hat."—Nagels Lustig, Wall, Berlin.

Importance Of New Route

Shipments Via Hudson Bay Will Greatly Benefit Western Business

Estimation is made that the shipments of wheat over the new Hudson Bay route will be made this fall. It is not proposed to begin shipments of other commodities until after first wheat shipments have been made.

The establishment of a route via Hudson Bay for the transport of Canadian wheat, cattle, and dairy products to the markets of Europe has been a possibility long anticipated by farmers and business interests of Western Canada. The objective which they might might be summed up in the following illustrations:

From Vancouver to Saint John, the eastern seaport of New Brunswick, is 3,366 miles, with an ocean voyage of Liverpool of 2,710 miles—a total of 6,076 miles. The Hudson Bay route provides a journey of 3,240 miles from Vancouver to Liverpool. From Edmonton to Churchill is only 1,338 miles, but the voyage there to Liverpool being 2,936 miles.

The products of Western Canada now reach the markets of Europe by way of the Great Lakes or by the Pacific ports and the Panama Canal. By either route the distance from Edmonton to Liverpool is 6,700 miles, but by the Hudson Bay route it is merely 4,744 miles.

The great importance of the new route from the point of view not only of the saving of time and the cutting of cost, but also from that of trade expansion, is expected to have outstanding effects upon the development of Western Canada.

Ideal Automobile Insurance

Would Have Higher Premium For Careless and Reckless Drivers

No automobile insurance bill will be satisfactory unless it provides penalties in the way of higher rates for careless and reckless drivers. The records of the state of Massachusetts and others show that a very large proportion of the accidents are caused by experienced drivers—men who seem to be getting into trouble continually.

An investigation into the records of drivers involved in fatal accidents shows that very few of them had a previous accident record. Some had been involved in three or more previous accidents, but a type of driver who just won't be careful. The way to curb these fellows is to make reasonable costs. They ought to be made to pay heavily for insurance.

World's Grain Exhibition and Conference

Farmers Will Win
\$210,750.00 in Prizes

The World's Grain Exhibition and Conference offers Canadian farmers an opportunity to share in cash prizes amounting to \$210,750.00. Competed in 50 competitive classes, open to the whole world, are 1,701 cash prizes. A few of the major awards follow:

\$2,500 a first prize for 30 pounds of wheat, 30 pounds of oats.
\$1,500 for 40 pounds of barley, 50 pounds of rye.
\$800 for 10 ears of corn.
\$500 for 10 pounds of peas, 30 pounds of flax, 30 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should mark for special care those areas that appear most promising. It should be understood that all seed and grain samples, if they are not already selected, will have to be found in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1932 by farmers of Canada. Their seed and grain exhibits must demonstrate to the world the quality of Canada's food crops.

Select the classes from the prize list most suited to the crop you grow; then select your samples from the best you have. It is best to make your entry NOW.

Your sample for exhibit must be in the hands of the Secretary of Regina on or before March 1, 1932. Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Provincial Committee, World's Grain Exhibition and Conference, care Department of Agriculture, your own province.

Show what you grow and share what you know

On exhibition, the strength, quality, value and reputation appearing competitive entries and all other information.
